Python/MATLAB for Physics
USPAS February 2022
Homework 0 Assignment

February 7, 2022

Due: 10am cst, Tues Feb 8th

Problem 0.1: Using Github

Program

Open Visual Studio Code (or your favorite text editor). Write a program that prints "Hello World!" and then prints numbers counting from 1 to 20. Put a comment at the top of the code that gives your name (but does not output it). Save the program as "HW01.py" in your private repository directory.

Uploading

Command line method: Navigate to your private repository directory. Enter the command `git add HW01.py`. Enter the command `git commit -m "upload HW0"`. Enter the command `git push`

Github Desktop method. Find the lefthand main and observe that your `HW01.py` is listed there as a change. Enter "upload HW0" into the textbox labeled "Summary (required)". Click "commit to main".
